

Step 1: Download and Install SSL Client (One Time)

1. Connect to the address "<https://vpn.newera.edu.my/sslvpn.html>" and login with your e-Account.

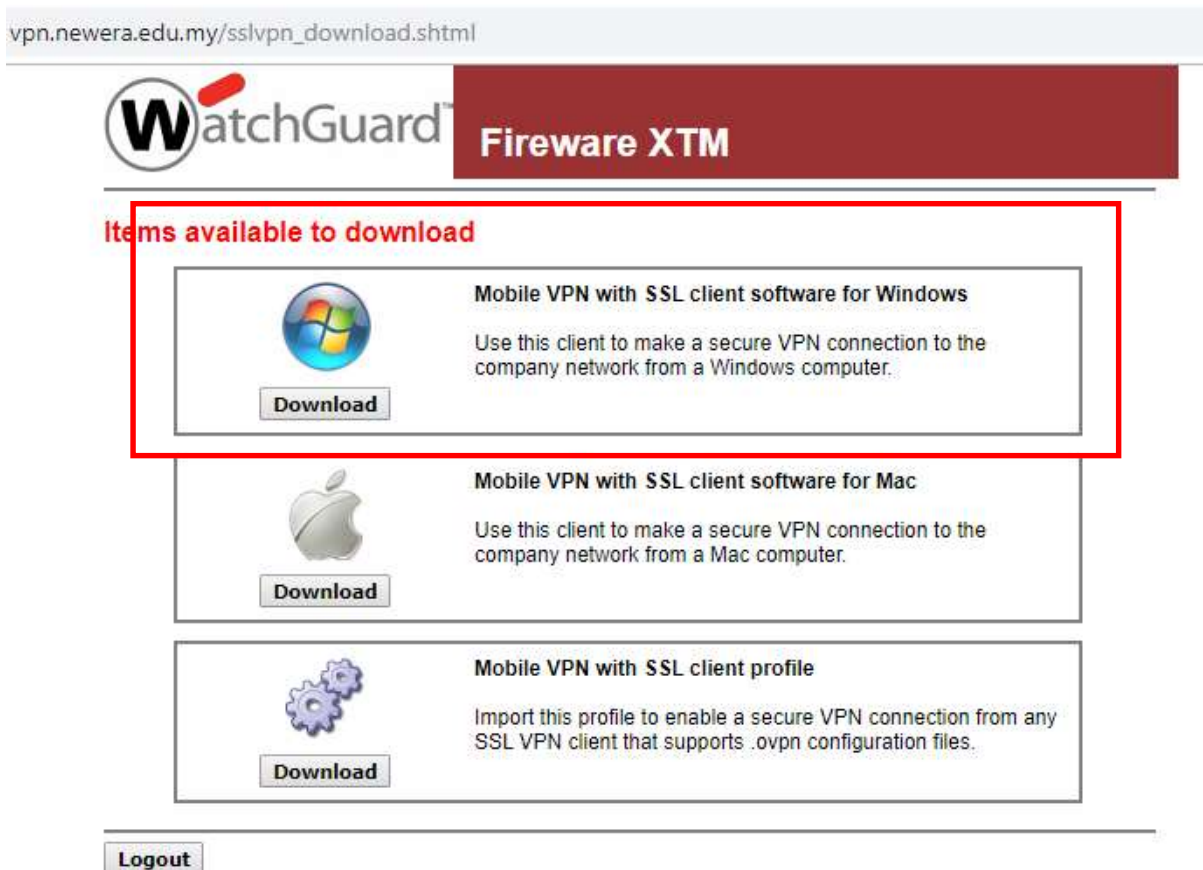

WatchGuard™

Username:

Password:

2. Click to download "Mobile VPN with SSL client software for Windows".

vpn.newera.edu.my/sslvpn_download.shtml

WatchGuard™ Fireware XTM

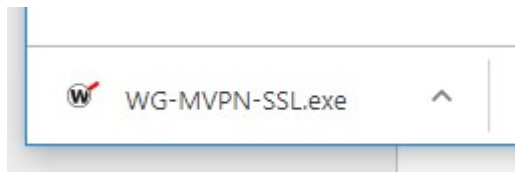

Items available to download

 **Mobile VPN with SSL client software for Windows**
Use this client to make a secure VPN connection to the company network from a Windows computer.

 **Mobile VPN with SSL client software for Mac**
Use this client to make a secure VPN connection to the company network from a Mac computer.

 **Mobile VPN with SSL client profile**
Import this profile to enable a secure VPN connection from any SSL VPN client that supports .ovpn configuration files.

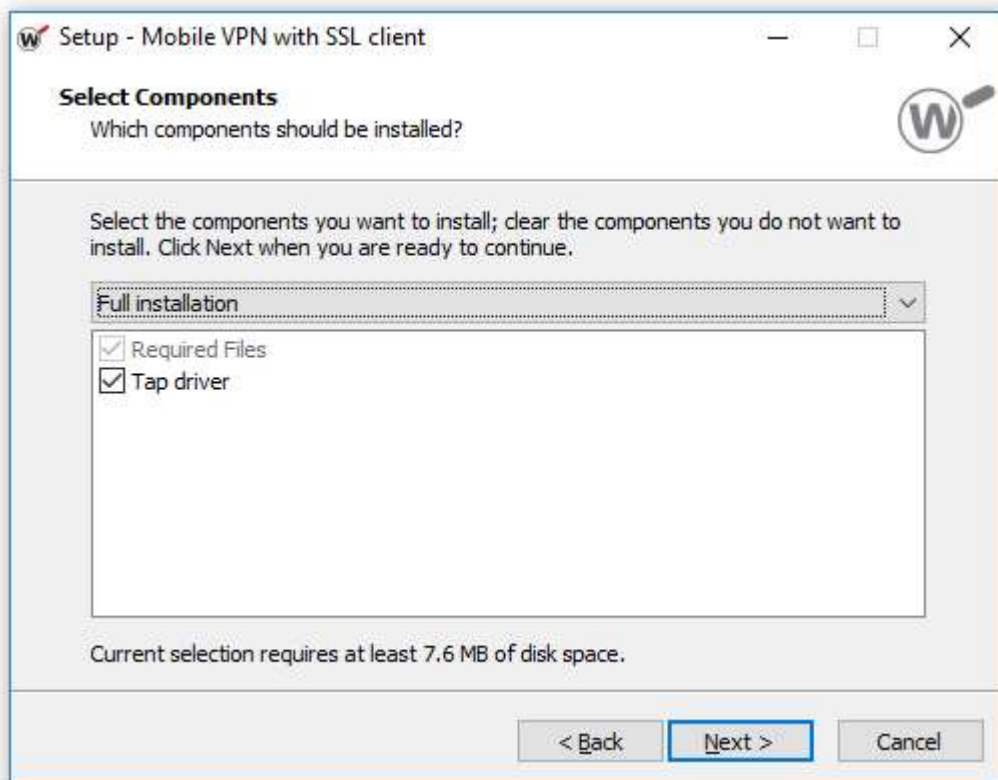

3. Click/Run the “WG-MVPN-SSL.exe” to install the VPN client after finished download.

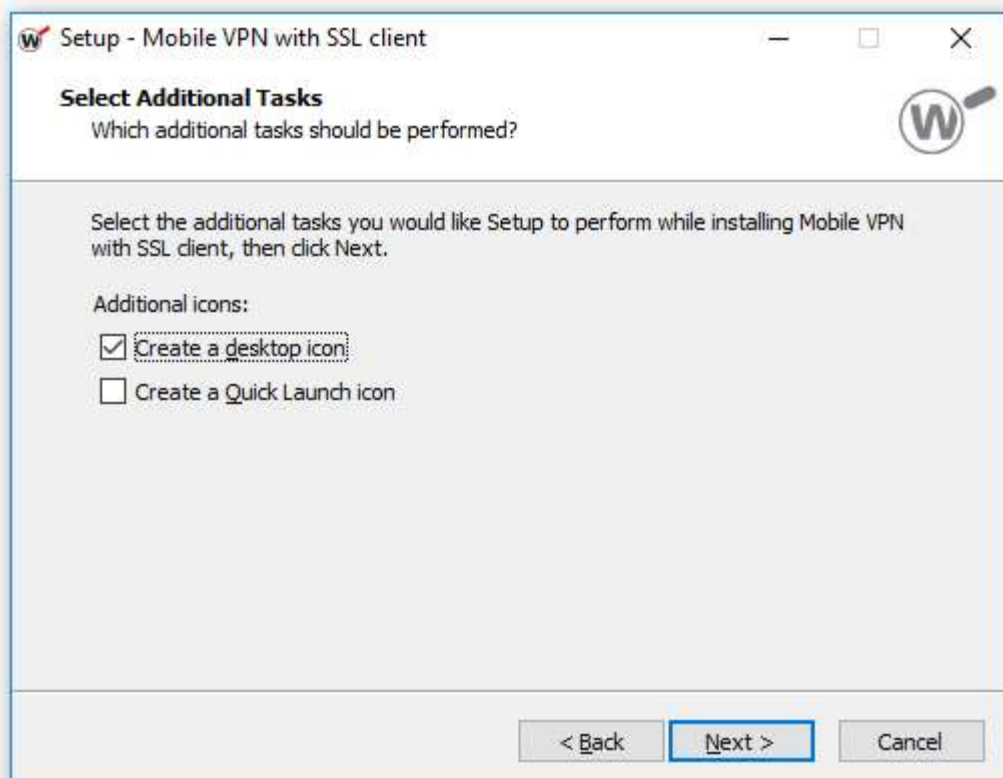

4. Click “Next” to continue.

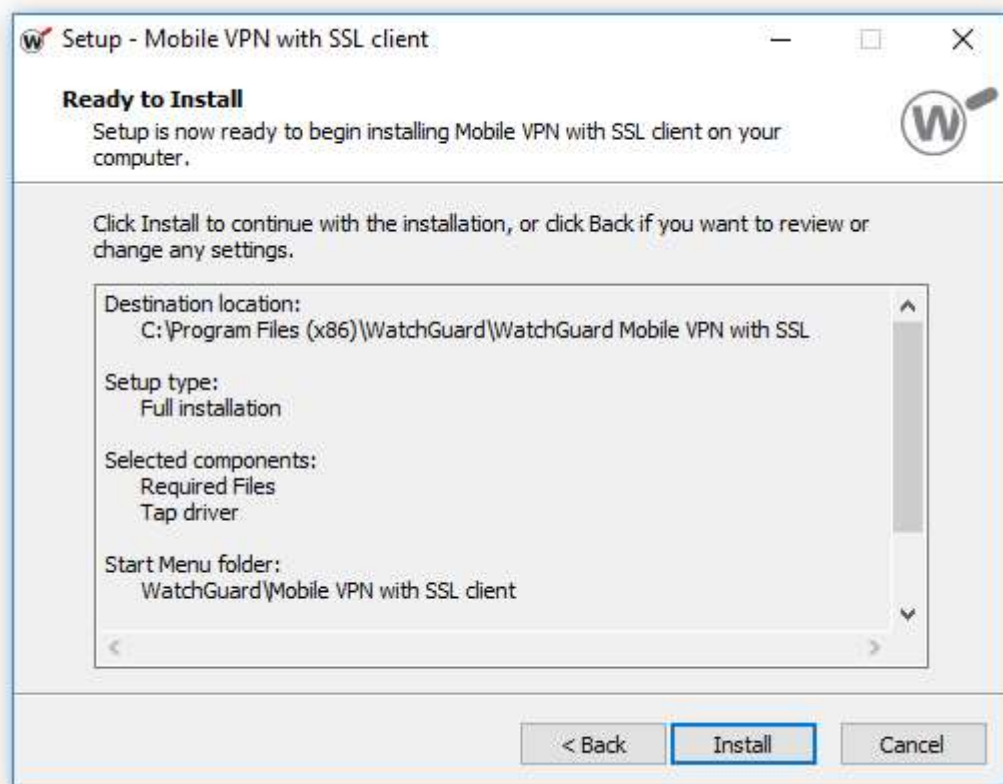

5. Choose “Full Installation” and click “Next” to continue.

6. Choose “Create a desktop icon” and click “Next” to continue.

7. Click "Install" to continue.

8. Lastly, click "Finish" to complete the installation.

9. Now the “Mobile VPN with SSL client” is on your desktop.
