RE: Return to Campus

According to instructions from the Ministry of Higher Education, all colleges and universities will gradually reopen from 15 October 2021 onwards. Students who have completed two doses of vaccinations (Fully Vaccinated) will be allowed to return to campus two weeks after completing the second dose of vaccinations.

In order to allow college students to return to the university college smoothly, the Ministry of Higher Education and the COVID-19 Immunisation Task Force (CITF) have jointly launched the “Program VACC2Campus” so that college and university students who have yet to be vaccinated can do so via walk-in vaccinations. New Era University College also encourages students to complete their vaccinations as soon as possible.

New Era University College will formulate a more detailed SOP in accordance with instructions from the Malaysian National Security Council and the Ministry of Higher Education. Please pay attention to the NEUC e-notice.

Thank you.
